7:30pm to 8:30pm for students in 10, 11 and 12 in 2019

RSVP: actura.com.au/alliance

ABOUT US

Actura excels in delivering highly engaging, STEAM-based, experiential learning programs. Delivered with real-life context, students foster an interest in space science, are empowered to set goals and follow their dreams by applying what they have learned throughout their lives.

In partnership with the California Association For STEAM Education (CASE) and NASA, the CASE Space School is an international study program aimed at developing students' critical skills for success, providing higher order thinking and exposure to real-world problems.

The CASE program is built on a strong foundation of the 'Seven Survival Skills' championed by Professor Tony Wagner from Harvard University. Each student is inspired to dream big and develop the skills necessary to achieve their dreams.

LEARNING OUTCOMES

- Development of critical thinking and problem-solving skills
- Skills in goal setting and project planning to set and achieve targets
- Effectiveness in collaborative teamwork
- Application of STEAM in challenging space missions
- Greater initiative, responsibility and leadership through influence
- Curiosity and imagination
- Pursuit of personal values and long-term goals
